---

Hi Ken, The Proposed Plan has been revised since the one included in the email below. The consultation request includes the current draft as well as a cd of the FS. I will also email you the word doc I the draft Propose Plan. I am available to discuss further if you have any questions. Thanks! Stephanie

=====

Hi Ken,

In follow up to Tammy's message, here is the information I received from Stephanie in SF back in November. I have not yet seen the formal request for consultation memo from Rick Karl to Margaret, but will try to track it down and pass it along to you. Per the Regional delegations, Superfund is delegated the authority to make risk-based decisions regarding PCB subject to a consultation with LCD. In response, we (LCD) write a response consultation memo to SF under Margaret's signature. I have some examples if you want to see them.

Thanks,  
Pete

PS - On another note, CMB is planning to meet this week to discuss the City Scrap & Salvage PCB issue.

Hi Peter,

Thank you for speaking with me this morning regarding the Sauget Area 1 Site and the need for an LCD consultation for the proposed risk-based disposal of PCBs at the Site. I am currently preparing the request for

consultation memo. In order to assist in the review of our forthcoming request I am sending you the RI/FS documents (via the links below) and a copy of the current draft of the Proposed Plan. Please do not hesitate to contact me if you have any questions.

Thanks & Have a Happy Thanksgiving!

Stephanie,

The hard copies of the Sauget Area 1 RI/FS report were shipped yesterday via FedEx economy. You should receive a package with two copies of the report, plus one extra CD, on Monday or Tuesday. (Just in time for Thanksgiving!)

Each report consists of two large binders. Volume I has the text and tables, and Volume II has the figures and appendices. There is a CD of the complete RI/FS report behind the title page of each hard copy of Volume I. The CD has a series of folders that contain PDFs of the text, tables, individual figures, and individual appendices.

At Steve Smith's request, I've prepared combined PDFs for your convenience if you would like to upload the RI/FS to the US EPA's web page for Sauget Area 1. I made three combined PDFs, and they can be downloaded by clicking on the following links. These links are valid for 15 days. If clicking on a link doesn't work, try pasting it into your browser.

The first PDF has Volume I (text and tables). The second PDF has all the figures and the third PDF has all the appendices. Notice that the PDF with the figures is about 220 MB and may take a while to download. Please let me know if you have problems with the links. If necessary I can send these combined PDFs to you on a CD.

Enjoy your holiday next week!

Regards,

James Kearley
